Essentials of Primary Care: A Core Curriculum for Practice in the Managed Care Era  
August 15-20, 2004  
Resort at Squaw Creek, North Lake Tahoe, California

Challenging patterns of medical practice are placing greater responsibility on primary care physicians. Increasingly difficult management decisions are now being faced and sunlight - more commonly associated with specialist practice. At the same time, many physicians are finding that they have to manage an increasing variety of procedures. This course will serve as an excellent update and review for current primary care physicians. The course is designed to provide a comprehensive “core curriculum” in adult primary care. The course will serve as an excellent update and review for current primary care physicians and other primary care professionals, as well as an opportunity for specialists to expand their primary care knowledge and skills.

This course is presented by the Division of General Internal Medicine, Department of Medicine, and is sponsored by the University of California, San Francisco School of Medicine.

EDUCATIONAL OBJECTIVES

An attendee completing this course should be able to describe:

- Current recommendations in on-demand preventive medicine and chronic care screening and management of common medical problems.
- Management of conditions related to women’s health including osteoporosis, menopause, hormone replacement therapy, and office procedures.
- Management strategies for common office problems including congestive heart failure, headaches, depression, anxiety, diabetes, and chronic diseases.
- Current issues in treatment of patients with acute and chronic pain.
- Diagnosis and treatment of common skin disorders and cancer.
- The use of diet therapy and nutritional supplements for prevention and treatment of chronic medical illness.
- Current approaches to obesity.
- Effective physical maintenance techniques and office procedures for electrolyte and office orthopedics.
- Current approaches to functional assessment, preservation of functional ability, and management of common problems in the elderly.
- Current strategies for effective informal decision making.

ACCREDITATION

The University of California, San Francisco School of Medicine (UCSF) is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians. UCSF designates this educational activity for a maximum of 30 category 1 credits toward the American Medical Association (AMA) Physician’s Recognition Award. Each physician should claim only those credits actually spent in the activity.

Current indications for surgery for GYN problems; Current strategies for prevention of heart disease including management of high blood pressure; Current indications and management of critical care problems including back pain, neck strain, headaches, and dizziness.

The California State Board of Registration has accepted courses approved by the AMA for category 1 credits as meeting the continuing education requirements for license renewal. Nurses licensed in states other than California should inquire with those State Boards for specific continuing education policies.

REGISTRATION INFORMATION

To register by mail or fax, register online at cme.ucsf.edu

Date: August 15-20, 2004
Location: Resort at Squaw Creek, North Lake Tahoe, California
Coast Fee: $565

REGISTRATION INFORMATION

For more information on this course, please visit cme.ucsf.edu or call 888/UCSF-0389 (888/827-3039) for information on this course.

EDUCATIONAL OBJECTIVES

An attendee completing this course should be able to describe:

- Current recommendations for prevention and early detection of cancer in women.
- Current indications and benefits of current available methods of contraception.
- Current strategies for prevention of heart disease including management of high blood pressure, high lipid level, and the use of dietary and nutritional supplements.
- Women’s health initiative findings and basis for current recommendations for hormone replacement therapy.
- Current indications and risks of available methods of contraception.
- Current strategies for increasing fitness prevening weight gain, and avoiding abuse of weight loss techniques including new diets, drugs, and surgical procedures.
- Strategies for management of common problems in office gynecology including infections, acne, cysts, abnormal menstrual bleeding and policy issues.
- Strategies for management of common acute care problems including back pain, neck strain, headaches, and dizziness.
- Current indications for surgery for GYN problems.
- Medical and legal considerations in prevention determination of and resistance to chemotherapy.
