Asian Heart and Vascular Symposium
Laurel Heights Conference Center
San Francisco, CA

The inaugural 2007 Asian Heart and Vascular Symposium will present the newest clinically relevant information available on heart and vascular diseases in the Asian American population for practicing cardiologists and other health care professionals. Faculty will review the results of recent studies in Asian Americans on coronary artery disease, major uncontrolled risk factors including hypertension and metabolic syndrome, higher incidence of intracranial and hemorrhagic, genetics in cardiac risk factors, peripheral vascular disease, and palpitations. Case studies will be included and adequate time will be planned for questions and interactions with the faculty after each set of lectures.

TARGET AUDIENCE
Designed for primary care physicians, cardiologists, neurologists, vascular surgeons, medical students, nurses, and pharmacists who provide care to Asian patients in a variety of settings.

EDUCATIONAL OBJECTIVES
Upon completion of this course, participants should be able to:

- Increase awareness of the health care disparities of CVD and stroke in the Asian patient
- Be aware of the epidemiology of CVD in the Asian subpopulations
- Disseminate the knowledge of prevalence and control of conventional risk factors in the Asian population
- Increase awareness of the higher incidence of stroke and intracranial hemorrhage in Asians
- Present the emerging data on genetic influence in Cardiac risk factors
- Improve detection and workup of primary cardiac arrhythmias in Asian patients
