Dr. Donald R. Smith, MD
Professor of Urology, Emeritus, UCSF • 1909-1991

Dr. Donald R. Smith received his medical degree from UCSF in 1935, joining the faculty five years later as a Clinical Instructor. In 1951, he succeeded Frank Hinman, Sr., as Chairman of the Division of Urology – a position he held for 25 years, training 72 residents.

Dr. Smith’s major clinical interests were fluid and electrolyte balance, renal physiology, reconstructive surgery (especially hypospadias repair), urinary tract infection, and pediatric urology. In 1957, he conceived and wrote the text, General Urology, which became a standard textbook in the field.

Dr. Smith’s contributions to urology were recognized with numerous awards and honors. He was a member of many professional societies and served as a mentor to many young urologists. He retired from active practice in 1991, but continued to be involved in the field until his death in 2009.

Dr. Smith is remembered for his dedication to teaching and mentoring future urologists, and for his significant contributions to the field of urology. His legacy lives on through the many urologists who were influenced by his teaching and mentorship.

ACCREDITATION

The University of California, San Francisco School of Medicine (UCSF) is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. UCSF designates this educational activity for a maximum of 12.25 AMA PRA Category 1 Credit(s) ™. Physicians should only claim credit commensurate with the extent of their participation in the activity.

This CME activity meets the requirements under California Assembly Bill 1195, continuing education and cultural and linguistic competency. For the purpose of recertification, the American Nurses Credentialing Center accepts AMA PRA category 1 credit issued by organizations accredited by the ACCME.
This course is designed for urologists, medical oncologists, radiation therapists and allied health professionals who evaluate and manage urologic malignancies. Internationally renowned faculty will present the most recent developments and state-of-the-art techniques in this field, with a focus on multidisciplinary care.

**EDUCATIONAL OBJECTIVES**
Upon completion of this course, participants should understand and be able to discuss:

- Prostate cancer prevention, detection, and risk assessment
- Treatment options for early stage prostate cancer, including active surveillance, radiation therapy, and minimally invasive techniques
- The benefits and limitations of androgen deprivation therapy for prostate cancer
- Novel therapeutics and clinical trials for prostate, renal, and testis cancer
- Treatment options for the superficially invasive and muscle invasive urothelial carcinoma of the bladder
- Surgical techniques for the treatment of renal cell carcinoma
- Role and impact of minimally invasive treatments for urothelial, renal, and testis cancer
- Treatment options for clinical state I testis cancer, both seminoma and non-seminomatous germ cell tumor
