# HIGH RISK EMERGENCY MEDICINE

Hotel Nikko  
San Francisco, CA

## May 21-23, 2008

High Risk Emergency Medicine is a course designed to address those topics that, due to the risk of misdiagnosis or misadventure, produce the greatest anxiety and concern in the daily practice of emergency medicine. Offered by San Francisco General Hospital, nationally renowned for emergency medical and trauma care, we have pulled together educational leaders in the field of Emergency Medicine and related specialties to address topics posing the greatest risk from a medical and medico-legal standpoint. Come learn from the best!

This conference is designed to meet the needs of the practitioner who may encounter a high risk condition in their daily medical practice. This includes practicing emergency physicians as well as internists, family practitioners and others who practice in an urgent care or emergency department setting.

High Risk Emergency Medicine is presented by the Division of Emergency Services at San Francisco General Hospital and the Department of Medicine at the University of California, San Francisco. The conference is sponsored by the Office of Continuing Medical Education, University of California, San Francisco School of Medicine.
