UCSF Israel Orthopaedic Innovation

ISRAEL: TEL AVIV, HAIFA, SAFED, REHOVOT, AND JERUSALEM

APRIL 22-29, 2013
Inspired by continued technological innovation, and amazing educational opportunities, the course will bring orthopaedic surgeons together for the purpose of exploring Israel’s medical breakthroughs and high tech miracles. The course consist of three components: 
1) Orthopaedic, medical, and high tech innovations
2) Orthopaedic CME lectures from pioneering subspecialists in trauma, joint replacement, and sports
3) Experiencing this beautiful and historic land.

TARGET AUDIENCE
The content of this course will provide information for the experienced and inexperienced surgeon and general orthopaedic surgeon as well as trainees. This course addresses important issues in orthopaedics, and enables attendees to gain relevant and essential knowledge. In particular, surgeons who are in general practice and take call or treat traumatic musculoskeletal injuries will be able to better use innovative and unique approaches to patient treatment.

OBJECTIVES
• Prepare orthopaedic surgeons and trainees to provide treatment in austere environments.
• Prepare orthopaedics surgeons and trainees to bring strategies for multi-casualty events to their practices.
• Prepare orthopaedic specialists to manage the broad spectrum of cases which present in the Emergency Room.
• Facilitate adoption of the newest evidence-based practices currently centered in Israel.
