CALL FOR ABSTRACTS
SUBMIT BY MARCH 3, 2014
ABSTRACTS WILL BE PUBLISHED IN PULMONARY CIRCULATION
OVERVIEW
Over the past decade, great strides have been made in our understanding of the pathobiology of pulmonary vascular disease, and from these findings new therapeutic options have emerged. It is increasingly clear that pulmonary vascular pathology is integral to a number of childhood disorders. In this symposium, we will bring together international experts to explore our current understanding of the basic pathobiology as well as new and future therapies for neonatal, pediatric, and adult pulmonary vascular diseases.

TARGET AUDIENCE
Pediatric and Adult Pulmonologists, Cardiology and Critical Care Physicians, Neonatology Physicians, and Advanced Practice Nurses.

COURSE DIRECTORS
Ian Adatia, MBChB
University of Alberta
Jeffrey Fineman, MD
UCSF Children’s Hospital

NEW THIS YEAR!
Two half-day, hands-on workshops, for practitioners (March 27), and an expanded half-day family session (March 29) oriented to the needs of family and children with pulmonary hypertension.

The hands-on workshops will include:
1. The invasive, non-invasive, and functional assessment of the PH patient,
2. Nuts and bolts of IV and SC therapies for nurses.
