The Postgraduate Course in Colorectal Surgery and Naffziger Surgical Society Day

March 6-8, 2014

Hotel Kabuki
San Francisco, CA

COURSE CHAIRS

Madhulika G. Varma, MD
Professor of Clinical Surgery
Chief, Section of Colorectal Surgery
University of California, San Francisco

Carlos U. Corvera, MD
Associate Professor of Surgery
Chief, Hepatobiliary & Pancreas Surgery
President of the Naffziger Society
University of California, San Francisco
The UCSF Center for Colorectal Surgery and the Naffziger Surgical Society have partnered together to present a postgraduate course that is focused on colorectal surgery. The Naffziger Surgical Society represents the UCSF department of surgery residency alumni association named after Howard C. Naffziger. This course will address advances in the surgical management of anorectal diseases, inflammatory bowel disease, colorectal and anal cancer, and pediatric colorectal conditions. We will have discussion of medical and surgical management of inflammatory bowel disease and colorectal cancer using round table discussions and a tumor board. We will also present complications of colorectal surgery, debates on current controversial subjects, and technical videos.

WHO SHOULD ATTEND THIS COURSE?
This symposium is designed for general surgeons, colorectal surgeons, and other surgeons and allied health professionals who participate in the surgical management of colorectal conditions.

Upon completion of this activity attendees will be able to:

- Incorporate new treatments and basic algorithms for treating anorectal disease;
- Identify management strategies for patients with anal dysplasia and cancer;
- Appreciate the multidisciplinary management of Crohns disease and Ulcerative colitis;
- Describe the reconstructive/restorative surgery required for pediatric colorectal conditions and their long term impact as this population ages;
- Discuss management strategies for various complications of colorectal surgery;
- Describe the current issues and controversies in the management of colorectal cancer including diagnostic imaging, multimodality treatment, and timing of treatments;
- Identify the difficulties in the management of inflammatory conditions and fistulas, indications for surgery, and which treatment strategies are available.
