Infectious Diseases in Clinical Practice:
Update on Inpatient and Outpatient Infectious Diseases

February 15-20, 2015

Grand Hyatt Kauai | Kauai, HI
OVERVIEW

Presented by the Department of Medicine, Division of Infectious Diseases, at the University of California, San Francisco School of Medicine, this course reviews clinically relevant topics in infectious diseases which are chosen because they are of interest to the practicing clinician or because there have been significant recent advances in diagnosis or treatment.

TARGET AUDIENCE

The course is designed to meet the needs of a variety of clinicians, including primary care physicians, family physicians, general practitioners, hospitalists, internists, nurse practitioners, pediatrics, and other health professionals who are involved with infectious diseases in the inpatient or outpatient settings.

EDUCATIONAL OBJECTIVES

Upon completion of the activity an attendee will refine how they:

- apply knowledge and principles to diagnose, manage, and treat common infections encountered in clinical practice such as skin and soft tissue infections, respiratory tract infections, urinary tract infections, gastrointestinal infections, hepatitis, Staphylococcus aureus infections, nosocomial infections, and infections of the central nervous systems;
- identify and manage less common infections, such as Lyme disease, pseudomonas infections, infections in immunocompromised patients, infections associated with travel, and mycobacterial infections;
- implement a work-up to diagnose HIV infection and manage the more common HIV-associated infectious diseases;
- use newer vaccines and antimicrobial agents including an understanding of their efficacy and appropriate usage for prevention and treatment of bacterial, viral, and fungal infections;
- recognize and treat the more common dermatologic manifestations of infectious diseases.

ACCREDITATION

The University of California, San Francisco School of Medicine (UCSF) is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.
