The Division of Infectious Diseases, Department of Medicine, University of California, San Francisco presents its annual symposium on Advances in Infectious Diseases. Now marking its 34th year, this conference emphasizes state-of-the-art therapy for patients with infectious diseases and also provides reviews of new developments.

TARGET AUDIENCE
This educational activity is intended for internists, family physicians, general practitioners, nurse practitioners, physician assistants, nurses, and pharmacists, who are involved in the care of patients with infectious diseases.

EDUCATIONAL OBJECTIVES
An attendee completing this course should be able to:
• Select appropriate treatment regimens for specific infections such as community acquired pneumonia, urinary tract infections, and bone and joint infections;
• Administer newer antibiotics correctly;
• Effectively manage common infections seen in the outpatient setting, including upper respiratory infections, pneumonia, urinary tract infections, dermatologic infections, and diarrhea;
• Understand infectious considerations in certain groups at special risk, including those with HIV and diabetes;
• Understand how the emergence of drug-resistant organisms is shaping therapy of common problems such as community-acquired pneumonia, sinusitis, pharyngitis, urinary tract infections, and sexually transmitted diseases;
• Interpret and apply up-to-date information on less common infections in the U.S., including tuberculosis, infections in travelers, and emerging infections;
• Counsel patients regarding new vaccines and expanded indications for established vaccines.
