7th ANNUAL BREAST DENSITY AND BREAST CANCER RISK ASSESSMENT WORKSHOP

SAN FRANCISCO, CALIFORNIA

COURSE DIRECTORS

John Shepherd, PhD

Associate Professor of Radiology and
Biomedical Imaging
University of California, San Francisco

Karla Kerlikowske, MD

Professor of Medicine and Epidemiology
and Biostatistics
University of California, San Francisco

Steven R. Cummings, MD

Director, SF Coordinating Center
Sutter Health Cal-Pacific Medical Center
San Francisco, California

WEDNESDAY - FRIDAY

June 10-12, 2015

A wide-angle photograph of a San Francisco cityscape, featuring several tall skyscrapers and a large public square in the foreground with many people and red umbrellas. The image is used as a background for the lower half of the poster.

We invite you to attend the **7th Annual Breast Density and Breast Cancer Risk Assessment Workshop** in San Francisco, June 10-12, 2015. A high amount of dense breast tissue has been shown to be one of the strongest risk factors for breast cancer, although the specific reason(s) for this is not known. Recent legislation in several states, including California, requires reporting of breast density to women with dense breasts undergoing mammography. Ideally, prior to enacting legislation, there would be guidelines on how best to measure breast density, what risk model to use that includes breast density to report breast cancer risk, as well as a standardized form to communicate this information. Research is ongoing to understand how different technologies that measure breast density relate to both breast cancer detection and breast cancer risk.

The 2015 Conference will feature continuing medical education credit and three days of presentations consisting of approximately 15 internationally-recognized invited speakers, and presentations selected from submitted abstracts. In addition, there will be poster sessions to highlight research from attendees. All registered participants are encouraged to submit an abstract for either poster or oral presentation. All parts of this workshop are devoted to breast density and breast cancer risk assessment.

TRAVEL SCHOLARSHIPS FOR ADVOCATES:

Breast cancer advocates that submit abstracts will be considered for a travel scholarship.

Look for more information soon about Abstract Submissions and Registration:
