The California Center for Pituitary Disorders at the University of California, San Francisco, invites you to attend its annual course on Pituitary Disorders: Advances in Diagnosis and Management. The program endeavors to provide the latest updates and recent advances regarding pituitary tumors and related disorders. Endocrinologists, neurosurgeons, neurologists, primary care providers, trainees in these fields, nurse practitioners, physician assistants, and other allied health professionals can benefit from this program in the diagnosis and management of pituitary tumors and disorders of pituitary function.

An attendee completing this course will be able to:

- Differentiate the risks, benefits, and alternatives of pituitary surgery to patients with different disease states;
- Perform clinical problem-solving to complex management of patients with acromegaly;
- Interpret subtle radiographic clues to the differential diagnosis of pituitary disorders in practice;
- Evaluate the genetic role of acromegaly and pituitary tumors and their implications on the role of medical therapy when discussing management with patients;
- Use the caveats of treatment in practice to appropriately manage hypopituitarism;
- Evaluate medical and surgical options to manage hyperprolactinemia;
- Assess the potential for clinically silent pituitary adenomas to transition to functioning adenomas.
### Pituitary Disorders: Advances in Diagnosis and Management

**SATURDAY, OCTOBER 21, 2017**
