Carmen Castro Franceschi and
Gladyne K. Mitchell Neurohospitalist
Distinguished Professor and
Chair, Department of Neurology

Wednesday - Friday (preceding Presidents’ Day)
February 12-14, 2020
Ritz-Carlton • San Francisco, California
The 53rd Annual Recent Advances in Neurology meeting was designed for the practicing neurologist to provide a review of clinical neurology with emphasis on areas of recent advances and progress in patient management. Both current concepts and new advances in neurologic disorders will be covered.

EDUCATIONAL OBJECTIVES

Based on discussions with UCSF faculty and practicing physicians at other institutions, the topics were chosen based on physician-identified need for practice-based knowledge.

The purpose of this program is to increase attendee competence and improve clinical practice in neurology, specifically to:

- Improve the ability to accurately make difficult diagnoses;
- Improve diagnosis and treatment of migraine and headache;
- Compare and contrast new treatment strategies for multiple sclerosis;
- Learn to recognize unusual features of common neuromuscular disorders;
- Learn and apply new evidence for acute stroke treatment;
- Recognize common and other movement disorders to facilitate appropriate therapy.

GREENER MEETING

We’re saving paper! The syllabus will be available electronically one week prior to the course. Optionally, if you wish to have a printed syllabus you may reserve one in advance for a fee.
