OBJECTIVES

The course presents topics based on physician-identified need for practice-based knowledge and application of the most recent advances in ophthalmology and in the management and treatment of glaucoma.

An attendee completing this course will be able to:

• Incorporate new techniques and treatment strategies in the management and treatment of glaucoma;
• Incorporate best available evidence and recent clinical research to improve patient assessment and treatment approaches;
• Improve clinical confidence through application of recent advances in ophthalmology;
• Assess and implement new minimally-invasive glaucoma surgical techniques into both glaucoma and general practice;
• Improve ability to consult with colleagues and patients regarding future and controversial developments in glaucoma care;
• Enhance the accuracy of clinical examination of patients by implementing methods for successfully obtaining accurate intraocular pressures in glaucoma patients.
